

FROM COMFORT TO PERFORMANCE

Everything you have always wanted to know
about the cycling pad you ride with.

At Elastic Interface® we believe that a great chamois needs to allow the cyclist to ride in the best possible condition. To do that, it has to make the athlete comfortable while in saddle.

But what does comfort mean? What makes a cycling pad comfortable and performing?

Have you ever thought about comfort as a compound of technical features working together?

From comfort to performance is a series of close-ups that will unravel each technical aspect of comfort - that is, performance.

Stay tuned & discover more!

From comfort to performance starts with a tour at our booth at Eurobike:
Hall A7, booth 218.

See you there!
