## rh+ presents Super Stylus and Ultra Stylus: lightness and visual comfort

PRESS RELEASE, 19<sup>th</sup> June 2018

The new rh+ sportglasses have been developed together with **Wanty-Groupe Gobert professional team** riders, ready to start in a few weeks for the 2018 Tour de France with the new Ultra Stylus model. These two new sportglasses feature a **super light frame**, equipped with long and thin rubber end tips, really comfortable and adjustable thanks to a metal core, for the best ergonomic but also for a fast and safe placement on the helmet.

rh+ Ultra Stylus

Thanks to riders' feedback both models, Ultra Stylus and Super Stylus, equipped with **mirrored lenses**, are provided also with an orange spare lens, perfect for rainy days as well as for mountainbike, where fast light changes require high technical performances.

rh+ Super Stylus

All the lenses, mask for the Ultra Stylus and biocular for the Super Stylus, are interchangeable and wide for the best visual and made with highest quality material: all in **Optical Class 1**, they ensure the highest standard in terms of protection and UV absorption, in compliance with the European safety requirements. That means protection of the eyes against UV rays, responsible for reducing the tear films, dryness and fatigue feeling. In a single word: comfort, even after many hours of sun exposure.
